

2023 Broadway Construction -- Water Main Update

Update #5, November 20, 2023

Dear Aurora Downtown Property and Business Owners,

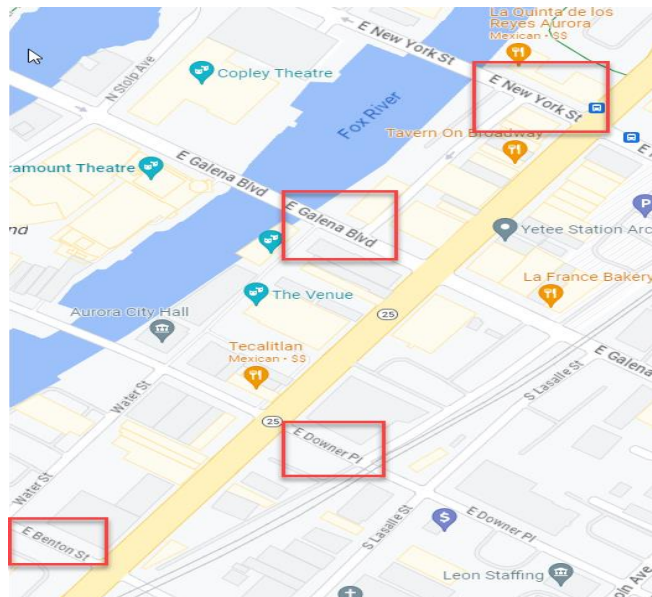

The contractor continues to have two crews working to expedite completion of the project

The first crew will continue to install mainline 16" diameter Broadway water main south into the E. Benton intersection this week.

A daily closure of Benton west of Broadway may be necessary to install that crossing.

The second crew will focus on connecting water services to the new water main north of E. Galena Boulevard. Testing and chlorination of the water main south of E. Galena Boulevard will be completed so water services can be connected to the new water main as soon as possible.

There may be occasional night work in order to install pipe across Broadway Avenue in several locations or to make water main connections with the least amount of disturbance.

For technical questions, please contact Kurt Muth, Engineer Coordinator for the City of Aurora at 630-701-4125 or MuthK@aurora.il.us. Please visit our Website for [updates](#).

Thank you for your continued cooperation.
